

# About Faerch

## Your trusted partner in circular food packaging

With a legacy spanning over five decades, Faerch stands as a global leader in food packaging. At Faerch, our global workforce 5,600 dedicated employees collaborates with esteemed food manufacturers and retailers across six continents.

Our goal has consistently been to ensure food safety, extend product shelf life, and reduce food waste.

Through our deep industry knowledge and expertise, we address the dynamic demands of food packaging across a range of segments, from Ready Meals and Fresh Meat to Food to Go and Dairy products.

It's evident now more than ever that food packaging needs rethinking. At Faerch, we've been proactive in promoting circularity in food packaging.

Proudly, we are the leading integrated recycler of PET pots, tubs, and trays, facilitating Tray 2 Tray recycling on a grand scale. This ensures that used PET food packaging is given new life, recycled into fresh food-grade containers without sacrificing quality.

Together with our owners AP Møller Holding, we are committed to continue our investment program to scale our recycling capabilities significantly.
